PROJECTS

smartBooth App (04/2022 - 07/2022)

- github.com/swadhinmahapatro/Smartbooth-app
- The SmartBooth web application includes several key features, including user authentication and role-based access control, ensuring that only authorized users can access the system. The application also provides an intuitive interface for voters, allowing them to cast their votes quickly and easily.

SSm(School System management) (04/2022 - 08/2022)

- github.com/swadhinmahapatro/NIST-Ssm
- Ssm helps schools manage various administrative and academic tasks efficiently. There are modules for student enrollment, attendance tracking, as well as the system is a duo final project in the B-tech program.

InstaBlood App (04/2023 - 07/2023)

- A complete fullstack Android project deployed and currently available in playstore.
- I was handling the whole frontend and integration management
